

who we are

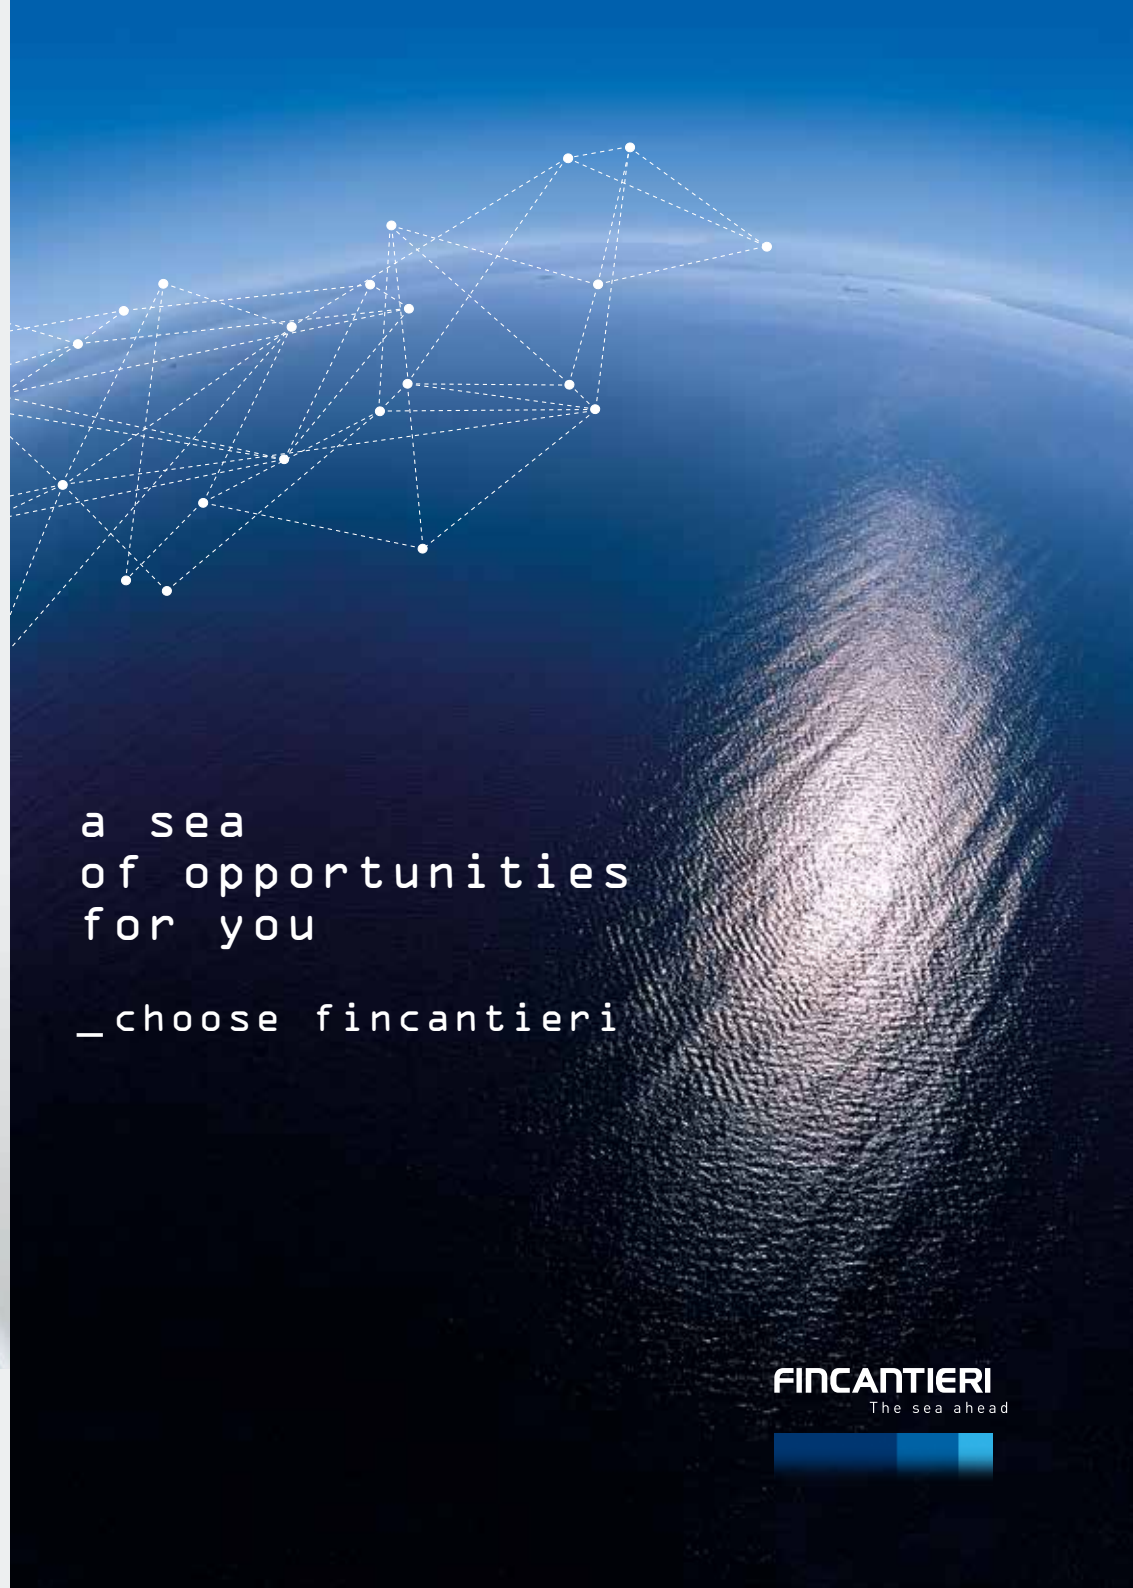

— Fincantieri is one of the world's largest shipbuilding groups and number one for diversification and innovation. It is leader in cruise ship design and construction and a reference player in all high-tech shipbuilding industry sectors, from naval to offshore vessels, from high-complexity special vessels and ferries to mega yachts, as well as in ship repairs and conversions, production of systems and mechanical and electrical component equipment and after-sales services. With over 230 years of history and more than 7,000 vessels built, Fincantieri has always kept its management offices, as well as all the engineering and production skills, in Italy.

With over 8,600 employees in Italy and a supplier network that employs nearly 50,000 people, Fincantieri has enhanced a fragmented production capacity over several shipyards into strength, acquiring the widest portfolio of clients and products in the cruise segment. To hold its own in relation to competition and assert itself at global level, Fincantieri has broadened its product portfolio becoming world leader in the sectors in which it operates.

With globalization, the Group has around 20 shipyards in 4 continents, over 19,000 employees and is the leading Western shipbuilder. It has among its clients the world's major cruise operators, the Italian and the US Navy, in addition to several foreign navies, and it is partner of some of the main European defense companies within supranational programs. Fincantieri's business is widely diversified by end markets, geographical exposure and by client base, with revenue mainly generated from cruise ship, naval and offshore vessel construction. Compared with less diversified players, such diversification allows it to mitigate the effects of any fluctuations in demand on the end markets served.

FINCANTIERI
The sea ahead

who we are looking for

_ imagining, designing,
_ building the future of the sea

— We have written a chapter in the history of shipbuilding. Today we are writing the future, with the innovative vision and the technological capability of a leading and ground-breaking system engineer.

Fincantieri is a dynamic company, constantly changing and capable of bringing together tradition, experience and innovation. A company that considers human capital an element of excellence and a primary success factor, that values competences and encourages aspirations, enabling its employees to express and develop their capabilities and ambitions in a challenging, stimulating international environment.

We aim to attract, develop and retain outstanding and motivated people, with distinctive intellectual curiosity, that will look ahead beyond the horizon and bring new skills and energy in order to cope with future challenges. Professionals that strive for excellence, foster change and improvement, facing and dealing with everyday life with dynamism and flexibility. We are convinced that change is driven by the people who promote it: extraordinary resources that stand out for their integrity, tenacity and sense of responsibility, and that with their commitment, engagement and passion, will contribute to building the future of the Company, the future of the sea, their future.
